EERC

PROVIDING PRACTICAL, PIONEERING SOLUTIONS TO THE WORLD'S ENERGY AND ENVIRONMENTAL CHALLENGES

The solution to each challenge brings with it the need for specialized expertise. The EERC's comprehensive research portfolio consists of a wide array of services specifically tailored to meet client needs. The EERC is known for its ability to bring cutting-edge science, engineering, and energy technologies together for the best possible solution. Our total-systems team can focus on technical details while retaining a holistic viewpoint.

Since it began operation 1951, the EERC has had great success developing engineering technologies and demonstrating them in real-world scenarios to prove their commercial viability. This success is due to the extensive experience of its multidisciplinary staff, global partnerships, and state-of-the-art facilities and equipment.

Critical Challenges | Practical Solutions

PEOPLE

The EERC's extraordinary **scientists, engineers, and support staff, working together across disciplines** with a broad array of state-of-the-art facilities and capabilities, are the foundation of our organization and sought after worldwide.

CORE RESEARCH PRIORITIES

- Coal Utilization & Emissions
- Carbon Management
- Oil & Gas
- Alternative Fuels & Renewable Energy
- Energy-Water

PRIORITIES

The EERC has **unparalleled responsiveness to critical issues** and is recognized as a progressive global leader working to make the world a better place to live.

PARTNERSHIPS

Since 1983, the EERC has served over 1300 clients in 53 countries and has a rich history of trusted, dynamic working relationships with **industry, government, and research entities** throughout the world.
